CitHYd

OLONA RIVER
Castiglione Olona

http://test.cithyd.com/it/stations/insert/5

MONTORFANO LAKE
Montorfano (CO)

http://test.cithyd.com/it/stations/insert/4

LURA RIVER
Lomazzo (CO)

http://test.cithyd.com/it/stations/insert/6

Trough a QR-Code reader, scan with your smartphone the selected QR-code, between the three test shown above, login (this is necessary only in this test phase), insert one or more fictitious water levels using the scrollbar, verify the presence of your data on the map in the website. Browse the website and tell us your experience. We will be happy to receive suggestions to improve CITHYD.

Note: the data of the test stations, the positioning and photographs are only for demonstration purpose and do not correspond to real stations. The water levels above a fixed threshold, defined for every station, are displayed as "possible flood" for 12 hours from the time of insertion.
