

# What's the water level? Let's keep an eye on!

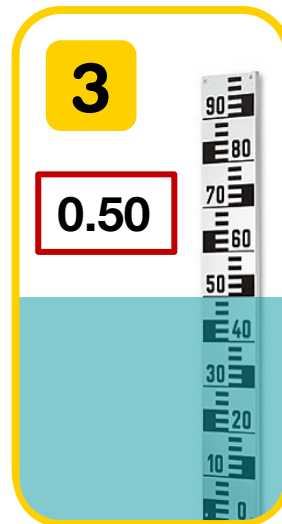

**HERE'S HOW YOU CAN HELP:** a smartphone and two minutes are enough

**Look at the river and read the water level on the staff gauge**

**Scan with your smartphone the QR code you see on the staff gauge**

**Insert in the website the water level you read and send it**

**You can immediately see on the map in the website the data you inserted and download datas inserted by other people**

CITHYD is a Citizen Science and Smart City experience create to collect water level datas involving citizens, researchers and institutions.

More people are involved, more information on river will be available!

**Everyone can participate**
